

HEALTHY CHILD POLICY

We know that your child's health is important to you. Health issues for your child and all children are important to us as well.

We emphasize faith in God for healing and will gladly pray with you for the health of your child.

We also emphasize using natural wisdom in preventing the spread of contagious illnesses and parasites (lice, mites, ringworm).

Therefore, we ask parents not to register a child that has had any of the following symptoms in the past twenty-four hours:

- ❖ Suspected fever
- ❖ Diarrhea
- ❖ Vomiting
- ❖ Consistent coughing or sneezing
- ❖ Colored nasal discharge
- ❖ Any discharge from the eyes or ears
- ❖ Any communicable disease with in a rash

If your child has symptoms due to allergies or another non-contagious condition, please let us know.

We understand that some symptoms remain in the body even after the sickness is past; however, to prevent the possibility of contamination, we ask the twenty-four hour symptom period be observed. Please talk to us if you have any concerns or if you have information from your pediatrician.

We hope our Healthy Child Policy assures you that part of our focus is to provide each child with a healthy environment during our church services.

We love children and consider it a privilege to minister to your child. Please bring your child back to the classroom once your child no longer has symptoms.

If there are any other health related issues for your child that you feel we should know about, please let us know. We are here to serve you.

Laminate this policy and post in the registration area.
